

SECURITY TALK

Preventing Lottery Theft

Lottery tickets are valuable to your business;

however, this product can become an **easy target for dishonest employees or customers**. Lottery tickets should be protected to prevent loss.

- Upon delivery, place lottery tickets in a secure area and periodically inspect ticket inventory.
- Tracking lottery sales and comparing those records back to the supply of tickets delivered to your business can help avoid inventory shrinkage.
- Be aware of the games you are selling.
- Unusual markings or missing tickets could indicate someone is attempting to steal from your store.
- Display lottery tickets out of the customers' reach.
- Hire reputable employees.

The Arkansas Scholarship Lottery is committed to ensuring that all aspects of our organization and games are trustworthy, fair, and ethical. **If you know of or suspect any impropriety, please contact lottery security as soon as possible.** Talk with your lottery marketing sales representative or visit the retailer section of our website for more information.
