

# FAST PLAY

## FAST PLAY DETAILS

Fast Play is an instant play-style game that prints from the retail terminals so players can determine instantly whether they have won. There are various ways to win, including matching certain symbols, adding up to a specified total or otherwise satisfying the requirements listed on the ticket. The regular Fast Play games are typically rotated on a regular basis.

## AR PROGRESSIVE JACKPOT

The AR Progressive Jackpot Fast Play incorporates a progressive jackpot gaming theme along with fixed lower-tier prizes. The game offers a chance to win a prize at different fixed-prize levels, or a portion of the cumulative jackpot, or the entire cumulative jackpot with each play/ticket purchase. The game is available at three different price points (\$1, \$2, and \$5). Each price point offers a portion of the progressive jackpot (\$1=20%, \$2=40%, \$5=100%). The AR Progressive Jackpot amount continuously grows with each ticket sold.
