

How to Load the Instant Ticket Dispenser

1. Position the first fold (colored side forward) of tickets all the way inside the dispenser firmly against the plastic. No tearing is needed. Look at the dispenser front and check that the tickets are straight, right-side-up, and facing forward. The ticket showing on the dispenser front should be the last ticket number in the pack (299 for \$1 packs, 149 for \$2 packs, and 059 for \$5 packs).
2. Bend the rest of the pack along the curve of the plastic. Push firmly to hold the pack in place.
3. Pull the tickets closest to you through the slot above the plastic rollers on the dispenser door. The tickets will be facing up. The first ticket through the slot should be ticket number 000.
